To stakeholders of ONYX Healthcare Inc.:

Audit opinion

We have audited the accompanying standalone balance sheet of ONYX Healthcare Inc. (referred to as "ONYX Healthcare" below) as at December 31, 2022 and 2021, the standalone statement of comprehensive income, standalone statement of changes in equity, and standalone cash flow statement from January 1 to December 31, 2022 and 2021, and notes to standalone financial statements (including a summary of significant accounting policies).

In our opinion, based on our audit results and audit results of other auditors (please refer to the Other Issues paragraph), all material disclosures of the standalone financial statements mentioned above were prepared in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and presented a fair view of the standalone financial position of ONYX Healthcare as at December 31, 2022 and 2021, and standalone business performance and cash flow for the periods January 1 to December 31, 2022 and 2021.

Basis of audit opinion

We have conducted our audits in accordance with "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and the auditing standards of the Republic of China. Our responsibilities as an auditor under the abovementioned standards are explained in the Responsibilities paragraph. All relevant personnel of the accounting firm have followed CPA code of ethics of the Republic of China and maintained independence from ONYX Healthcare, and fulfilled other responsibilities under the code of ethics. We believe that the evidence obtained from audit and reports made by other auditors provide an adequate and appropriate basis for our opinion.

Key audit issues

Key audit issues are matters that we considered to be the most important, based on professional judgment when auditing the 2022 standalone financial statements of ONYX Healthcare. These issues have already been addressed when we audited and formed our opinions on the standalone financial statements. Therefore, we do not provide opinions separately for individual issues.
Key audit issues concerning the 2022 standalone financial statements of ONYX Healthcare are as follows:

**Existence of revenues from new top-10 buyers**

**Description**

Please refer to Note 4(29) for the accounting policy on revenue recognition. For a detailed description of revenue accounts, please refer to Note 6(21) of the standalone financial statements.

ONYX Healthcare and subsidiaries (presented as equity-accounted investments) are mainly involved in the design, manufacturing, and sale of medical computers. Due to the fact that medical computers are customized for specific purposes, the sale of which is highly susceptible to cyclicality and varies from customer to customer, project to project. For this reason, ONYX Healthcare is constantly in need of exploring new markets and meet orders for different projects, causing changes in top-10 buyers. After comparing ONYX Healthcare's top-10 buyers in 2022 and 2021, new buyers added to this year's top-10 list were considered to have a significant effect on the revenues of ONYX Healthcare and its subsidiaries. As a result, we have identified ONYX Healthcare's new buyers in the top-10 list as one of the key audit issues this year.

**Audit procedures**

This issue concerned ONYX Healthcare and certain subsidiaries (presented as equity-accounted investments), and the following audit procedures were taken specifically in relation to the key audit issues described above:

1. Assessment and testing of internal control processes on sales transactions to determine whether transactions were carried out according to the company's internal control system during the reporting period.
2. Reviewing industry background and profile of the new top-10 buyers.
3. Random checks for proof of revenue and transaction with new top-10 buyers in the current period.
Accounting estimates for inventory valuation

Description

For accounting policies on inventory valuation, please refer to Note 4(12) of the standalone financial statements; for major accounting estimates, assumptions, and uncertainties on inventory valuation, please refer to Note 5(2) of the standalone financial statements; for detailed inventory accounts, please refer to Note 6(4) of the standalone financial statements.

ONYX Healthcare is mainly involved in the design, manufacturing, and sale of medical computers. Due to the long useful life of medical computers, ONYX Healthcare is required to maintain inventory of certain products and peripherals for longer periods of time in order to meet customers' needs for long-term supply and maintenance. Any change in customers' purchase order or under-performance of the market would cause fluctuation in product pricing or slow down the rate at which inventory is sold, therefore increasing risk of loss on devaluation or obsolescence. ONYX Healthcare accounts for normal inventory at the lower of cost and net realizable value; inventory that exceeds certain duration of time or has been individually identified as obsolete will have loss provisions made on an item-by-item basis according to the devaluation loss provisioning policy.

ONYX Healthcare makes timely adjustments to inventory level in response to changes in market demand and the Company's development strategies. The Company carries a wide variety of medical computers, which also makes up a substantial portion of the Company's product portfolio and a high amount of inventory. Furthermore, evaluation of net realizable value on obsolete inventory often involves subjective judgments, making the estimated amount prone to uncertainties, and was one of the key areas we had to verify as part of our audit. For this reason, we have identified the estimation of inventory valuation losses as one of the key audit issues for this year.

Audit procedures

This issue concerned ONYX Healthcare and certain subsidiaries (presented as equity-accounted investments), and the following audit procedures were taken specifically in relation to the key audit issues described above:

1. Evaluating the policy adopted by ONYX Healthcare to make provisions for inventory devaluation losses, based on our understanding of the company's operations and industry nature.
2. Examining details of individual inventory items that the management had considered to be obsolete, and verifying against supporting documents.

3. Testing the market prices based upon which net realizable values of individual inventory items were established, and making random checks to ensure that net realizable values were correctly calculated.

Other issues - audits by other auditors

Amongst the equity-accounted business investments presented in the standalone financial statements of ONYX Healthcare, some of which had financial statements audited by other CPAs that we did not take part of. Therefore, opinions made in the standalone financial statements mentioned above in regards to such businesses were based on audited reports of other CPAs. As at December 31, 2022 and 2021, balances of the abovementioned equity-accounted investments totaled NT$606,637 thousand and NT$561,275 thousand, representing 32% and 34% of total assets, respectively. For the periods from January 1 to December 31, 2022 and 2021, comprehensive income recognized from the abovementioned companies totaled NT$74,696 thousand and NT$49,261 thousand, representing 35% and 40% of comprehensive income, respectively.

Responsibilities of the management and governing body to the standalone financial statements

Responsibilities of the management were to prepare and ensure fair presentation of standalone financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and to exercise proper internal control practices that are relevant to the preparation of standalone financial statements so that the standalone financial statements are free of material misstatements, whether caused by fraud or error.

The management's responsibilities when preparing financial statements also involved: assessing the ability of ONYX Healthcare to operate, disclose information, and account for transactions as a going concern unless the management intends to liquidate or cease business operations, or is compelled to do so with no alternative solution.

The governing body of ONYX Healthcare (including the Audit Committee) is responsible for supervising the financial reporting process.

Responsibilities of CPAs in Inspecting Individual Financial Statements
The purposes of our audit were to obtain reasonable assurance of whether the financial statements were prone to material misstatements caused by fraud or error, and to issue a report of our audit opinions. Reasonable assurance provides a high degree of certainty. However, audit tasks conducted in accordance with auditing principles of the Republic of China do not necessarily guarantee detection of all material misstatements within the standalone financial statements. Misstatements can arise from fraud or error. Misstatements are considered material if the individual amount or aggregate total is reasonably expected to affect economic decisions of the financial statement user.

When conducting audits in accordance with audit principles Republic of China, we exercised judgments and raised doubts as deemed professionally appropriate. We also performed the following tasks as an auditor:

1. Identifying and assessing risks of material misstatement due to fraud or error; designing and executing appropriate response measures for the identified risks; and obtaining adequate and appropriate audit evidence to support audit opinions. Fraud may involve conspiracy, forgery, intentional omission, untruthful declaration, or breach of internal control, and our audit did not find any material misstatement where the risk of fraud is greater than the risk of error.

2. Developing the required level of understanding on relevant internal controls and designing audit procedures that are appropriate under the prevailing circumstances, but without providing opinion on the effectiveness of internal control system of ONYX Healthcare.

4. Forming conclusions regarding the appropriateness of management's decision to account for the business as a going concern, and whether there are doubts or uncertainties about the ability of ONYX Healthcare to operate as a going concern, based on the audit evidence obtained. We are bound to remind users of standalone financial statements and make related disclosures if uncertainties exist in regards to the abovementioned events or circumstances, and amend audit opinions when the disclosures are no longer appropriate. Our conclusions are based on the audit evidence obtained up to the date of audit report. However, future events or circumstances may still render ONYX Healthcare no longer capable of operating as a going concern.

5. Assessing the overall presentation, structure, and contents of the standalone financial statements (including related footnotes), and whether certain transactions and events are presented appropriately in the financial statements.
6. Obtaining sufficient and appropriate audit evidence on financial information of equity-accounted investments held by ONYX Healthcare, and expressing opinions on standalone financial statements. Our responsibilities as auditor are to instruct, supervise and execute audits and form audit opinions on the standalone financial statements.

We have communicated with the governing body about the scope, timing, and significant findings (including significant defects identified in the internal control) of our audit.

We have also provided the governing body with a declaration of independence stating that all relevant personnel of the accounting firm have complied with auditors' professional ethics of the Republic of China, and communicated with the governing body on all matters that may affect the auditor's independence (including protection measures).

We have identified the key audit issues after communicating with the governance body regarding the 2022 standalone financial statements of ONYX Healthcare. These issues have been addressed in our audit report except for: 1. Certain topics that are prohibited by law from disclosing to the public; or 2. Under extreme circumstances, topics that we decided not to communicate in the audit report because of higher negative impacts they may cause than the benefits they bring to public interest.

ONYX Healthcare Inc.
Notes to Standalone Financial Statements
For 2022 and 2021

Unit: NTS thousand
(Unless specified otherwise)

I. Company history

ONYX Healthcare Inc. (the "Company") was incorporated on February 2, 2010 in the Republic of China. The Company is mainly involved in the design, manufacturing, and trading of medical computers and peripherals. AAEON Technology Inc. holds 48.87% equity ownership in the Company, whereas ASUSTeK Computer Inc. is the Company's ultimate parent.

II. Financial statement approval date and procedures

This standalone financial report was passed during the board of directors meeting dated February 21, 2023.

III. Application of new standards, amendments and interpretations

(I) Impacts of adopting new and amended International Financial Reporting Standards (IFRS) approved by the Financial Supervisory Commission (FSC)

The following is a list of new/amended/modified IFRSs and interpretations approved by FSC that are applicable for 2022:

<table>
<thead>
<tr>
<th>New/amended/modified standards and interpretations</th>
<th>Effective date of IASB announcement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amendments to IFRS 3 regarding &quot;Reference to the Conceptual Framework&quot;</td>
<td>January 1, 2022</td>
</tr>
<tr>
<td>Amendments to IAS 16 regarding &quot;Property, Plant and Equipment: Proceeds before Intended Use&quot;</td>
<td>January 1, 2022</td>
</tr>
<tr>
<td>Amendment to IAS 37 regarding &quot;Onerous Contracts - Cost of Fulfilling a Contract&quot;</td>
<td>January 1, 2022</td>
</tr>
<tr>
<td>Improvements for years 2018-2020</td>
<td>January 1, 2022</td>
</tr>
</tbody>
</table>

After a thorough assessment, the Company expects no material financial or performance impact from the above standards and interpretations.

(II) Impacts of adopting new and amended IFRSs not yet approved by FSC

The following is a list of new/amended/modified IFRSs and interpretations approved by FSC that are applicable for the 2023 financial year:
After a thorough assessment, the Company expects no material financial or performance impact from the above standards and interpretations.

(III) **Impacts of IFRS changes announced by International Accounting Standards Board (IASB) but not yet approved by FSC**

The following is a list of new/amended/modified IFRSs announced by IASB but not approved by FSC:

<table>
<thead>
<tr>
<th>New/amended/modified standards and interpretations</th>
<th>Effective date of IASB announcement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amendments to IFRS 10 and IAS 28 regarding &quot;Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture&quot;</td>
<td>Pending final decision from IASB</td>
</tr>
<tr>
<td>Amendments to IFRS 16 regarding &quot;Lease liability in a sale and leaseback&quot;</td>
<td>January 1, 2024</td>
</tr>
<tr>
<td>IFRS 17 - Insurance Contracts</td>
<td>January 1, 2023</td>
</tr>
<tr>
<td>Amendments to IFRS 17 - &quot;Insurance Contracts&quot;</td>
<td>January 1, 2023</td>
</tr>
<tr>
<td>Amendments to IFRS 17 - &quot;Initial Application of IFRS 17 and IFRS 9 - Comparative Information&quot;</td>
<td>January 1, 2023</td>
</tr>
<tr>
<td>Amendments to IAS 1 regarding &quot;Classification of Liabilities as Current or Non-current&quot;</td>
<td>January 1, 2024</td>
</tr>
<tr>
<td>Amendments to IAS 1 regarding &quot;Non-current Liabilities with Covenants&quot;</td>
<td>January 1, 2024</td>
</tr>
</tbody>
</table>

After a thorough assessment, the Company expects no material financial or performance impact from the above standards and interpretations.

**IV. Summary of significant accounting policies**

Below is a summary of significant accounting policies used for the preparation of standalone financial statements. Unless otherwise stated, the following policies were applied consistently in all reporting periods.

(I) **Statement of compliance**

The standalone financial statements have been prepared in accordance with "Regulations
Governing the Preparation of Financial Reports by Securities Issuers.

(II) **Basis of preparation**

1. This standalone financial report is prepared based on historical cost, except for items including financial assets and liabilities at fair value through profit or loss (including derivatives) and financial assets at fair value through other comprehensive income.

2. Preparation of financial report that complies with the version of International Financial Reporting Standards, International Accounting Standards and interpretations approved by FSC (collectively referred to as "IFRSs" below) involves some adoption of critical accounting estimates, and the management is required to exercise certain judgment when applying the Company's accounting policies. Please refer to Note 5 for highly complex and significant assumptions and estimates made in relation to the standalone financial report.

(III) **Foreign currency conversion**

All items listed in the standalone financial report are measured using the currency of the main economic environment where the Company operates (i.e. the functional currency). This standalone financial report is presented using the Company's functional currency - "NTD."

1. Foreign currency transaction and balance
   
   (1) Foreign currency transactions are converted into the functional currency using the spot exchange rate at the transaction date or measurement date. Differences arising from the conversion of such transactions are recognized in current profit and loss.
   
   (2) Balances of monetary assets and liabilities denominated in foreign currencies are converted using the spot exchange rate as at the balance sheet date. Differences arising from exchange rate fluctuation are recognized as current period gain or loss.
   
   (3) For non-monetary assets and liabilities denominated in foreign currencies, those that are carried at fair value through profit or loss will have balances converted using the spot exchange rate as at the balance sheet date, and any exchange differences arising from the adjustment will be recognized in current profit and loss; those that are carried at fair value through other comprehensive income will have balances converted using the spot exchange rate as at the balance sheet date, and any exchange differences arising from the adjustment will be recognized in other comprehensive income; those that are not carried at fair value will have balances converted using the historical exchange rate applicable at the time when the transaction was initiated.
   
   (4) All gains and losses on the exchange are presented as "Other gains and losses" in the statement of comprehensive income.

2. Currency conversion for foreign operations
   
   For entities and associated companies that have a functional currency different from the
presentation currency, performance results and financial position are converted into the presentation currency using the following methods:

(1) Every asset and liability in the balance sheet is converted using the exchange rate as at the balance sheet date;
(2) Every income, expense, and loss in the statement of comprehensive income is converted using the average exchange rate for the given period; and
(3) All exchange differences are recognized in other comprehensive income.

(IV) Classification of current and non-current assets and liabilities

1. Assets that satisfy any of the following criteria are classified as current assets:
   (1) Assets that are expected to be realized, or intended to be sold or consumed, over the normal operating cycle.
   (2) Held mainly for the purpose of trading.
   (3) Assets that are expected to be realized within 12 months after balance sheet date.
   (4) Cash or cash equivalents, except those that will be swapped or used to repay liabilities at least 12 months from the balance sheet date, and those with restricted uses.

   The Company classifies all assets that do not satisfy the above criteria as non-current assets.

2. Liabilities that satisfy any of the following criteria are classified as current liabilities:
   (1) Liabilities that are expected to be settled over the normal operating cycle.
   (2) Held mainly for the purpose of trading.
   (3) Liabilities that are due to be settled within 12 months after the balance sheet date.
   (4) Liabilities with repayment terms that cannot be extended unconditionally for more than 12 months after the balance sheet date. Classification of liability is unaffected even if there are terms that give counterparties the option to be repaid in the form of equity instruments.

   The Company classifies all liabilities that do not satisfy the above criteria as non-current assets.

(V) Cash equivalents

Cash equivalent refers to short-term and highly liquid investments that are readily convertible into known amounts of cash and are prone to an insignificant risk of changes in value. Time deposits that meet the abovementioned definitions and are held for a tenor of less than three months from initiation to meet short-term cash commitments are stated as cash equivalents.

(VI) Financial assets at fair value through profit or loss

1. Refers to financial assets that are not carried at cost after amortization or at fair value through other comprehensive income.
2. The Company adopts trade day accounting to account for financial assets at fair value through profit or loss.
profit or loss that conform with normal trade terms.

3. These items are recognized at fair value at initiation with transaction costs recognized through profit and loss and subsequently assessed at fair value with gains or losses recognized through profit and loss.

4. Dividend income is recognized in a standalone statement of comprehensive income when the entitlement to receive dividend has been established when economic benefits relating to dividends are very likely to be realized. The amount in dividend can be measured reliably.

(VII) Financial assets at fair value through other comprehensive income

1. Refers to equity instruments not held for trading for which an irrevocable choice was made at initiation to account for subsequent fair value changes through other comprehensive income.

2. The Company adopts trade day accounting to account for financial assets at fair value through other comprehensive income that conforms with normal trade terms.

3. These assets are recognized at fair value at initiation inclusive of transaction cost, and are subsequently measured at fair value:

A. Changes in the fair value of equity instruments are recognized through other comprehensive income. When the asset is removed from the balance sheet, all cumulative gains/losses previously recognized through other comprehensive income can not be reclassified to profit and loss and are transferred to retained earnings instead. Dividend income is recognized in a standalone statement of comprehensive income when the entitlement to receive dividend has been established when economic benefits relating to dividends are very likely to be realized. The amount in dividend can be measured reliably.

(VIII) Accounts receivable

1. Refers to accounts that the Company may collect unconditionally as consideration for the transfer of merchandise or rendering of service, according to the terms of the respective contracts.

2. Short-term accounts receivable that bear no interest are subsequently measured at the original invoice amount as the effect of discounting is insignificant.

(IX) Impairment of financial assets

Accounts receivable with significant financing components are evaluated on every balance sheet date by taking into account all reasonable and verifiable information (including prospective information). Assets that exhibit no significant increase in credit risk after initial recognition have loss reserves measured based on 12-month expected credit loss; those that exhibit a significant increase in credit risk after initial recognition have loss reserves measured based on expected credit loss over the remaining duration. Accounts receivable that do not contain significant financing components have loss reserves measured based on expected credit...
loss over the remaining duration.

(X) Removal of financial assets

Financial assets are removed from the balance sheet when entitlement to contractual cash inflow has ended.

(XI) Lease transaction as a lessor - operating lease

Income from the operating lease net of any incentive granted to the lessee is amortized on a straight-line basis over the lease duration and recognized in current profit or loss.

(XII) Inventory

Inventory is stated at the lower of cost or net realizable value. The amount in cost is determined using the weighted average method. The cost of finished goods and work-in-progress includes raw material, direct labor, other direct costs, and production-related overheads (allocated based on normal production capacity), but excludes the cost of borrowing. The lower of cost or net realizable value is compared on an item-by-item basis. Net realizable value is the estimated selling price in the ordinary course of business less estimated costs to be incurred for completion and estimated costs necessary to complete the sale.

(XIII) Equity-accounted investments/subsidiaries and associated companies

1. A subsidiary refers to an entity (including a structured entity) in which the Company exercises control. The Company is considered to exercise control if it is exposed or entitled to variable returns generated by the entity and can influence such return.

2. Any unrealized gains/losses arising from transactions between the Company and subsidiaries have been eliminated. The subsidiaries have made the necessary adjustments to align their accounting policies with that of the Company.

3. Share of profits/losses from the associated company after the acquisition is recognized in current profit and loss; share of other comprehensive income after the acquisition is recognized in other comprehensive income. If the share of losses on a subsidiary equals or exceeds the Company's equity ownership, the Company will continue recognizing additional losses at the current shareholding percentage.

4. Associated company refers to an entity in which the Company exercises significant influence but no control, which generally means 20% direct or indirect voting interest or above. The Company accounts for associated companies using the equity method. Value at initial acquisition is accounted for at cost.

5. Share of profits/losses from an associated company after the acquisition is recognized in current profit and loss; share of other comprehensive income after the acquisition is recognized in other comprehensive income. If the Company's share of losses in an
associated company equals to or exceeds its equity interest in the associated company (including any other unsecured receivables), the Company will not recognize the extra losses unless the Company has a legal obligation or constructive obligation to pay, or has paid, liabilities on behalf of the associated company.

6. If an associated company undergoes a change of equity that has no impact on profit and loss, other comprehensive income, and shareholding percentage, the Company will recognize the change of ownership proportionally in "Capital reserve."

7. Unrealized gains arising from transactions between the Company and an associated company are eliminated proportionally based on ownership percentage. Unrealized losses are also eliminated unless there is evidence to suggest impairment in the transferred assets. All associated companies have made the necessary adjustments to align their accounting policies with that of the Company.

8. If the Company disposes of an associated company in a manner that causes it to lose significant influence, all amounts previously recognized in other comprehensive income in relation to the associated company are accounted on the same basis as if the Company had directly disposed of the relevant assets or liabilities. In other words, if gains or losses previously recognized in other comprehensive income are to be reclassified into profit and loss upon disposal of relevant assets or liabilities, such gains or losses shall be reclassified into profit and loss when the Company loses significant influence in the associated company. If the Company still retains significant influence in the associated company, the above amounts previously recognized in other comprehensive income are reclassified proportionally in the manner mentioned above.

9. According to Regulations Governing the Preparation of Financial Reports by Securities Issuers, the amount in current profit/loss and other comprehensive income attributable to parent company shareholders should be consistent between standalone and consolidated financial reports; the amount in equity attributable to parent company shareholders should also be consistent between standalone and consolidated financial reports.

(XIV) Property, plant and equipment

1. All property, plant and equipment are recorded at cost.

2. Subsequent costs incurred are added to book value or recognized as separate assets only when future economic benefits associated with the costs are likely to be realized by the Company. Such costs can be reliably measured. Book values of replaced components are removed from the balance sheet. All other maintenance expenses are recognized in current profit and loss when incurred.

3. Property, plant and equipment are subsequently measured at cost (except for land, which is not depreciated) and are depreciated on a straight-line basis over their estimated useful
lives. Significant compositions of property, plant, and equipment are depreciated separately.

4. The Company reviews the residual value, useful life, and depreciation method of all assets at the end of each financial year. If the residual value or useful life differs from the previous estimate, or if there is any material change to how an asset's future economic benefit is realized, the difference would be treated as a change in accounting estimate according to IAS 8 - "Accounting Policies, Changes in Accounting Estimates and Errors" from the day the change occurs. The useful lives of various asset categories are explained in Note 6(7).

(XV) **Lease transaction as a lessee - right-of-use assets/lease liabilities**

1. The Company recognizes a right-of-use asset and a lease liability on the day lease asset becomes available for use. For short-term lease and lease of low-value asset, lease payments are expensed using the straight-line method over the lease tenor.

2. Lease liability is recognized on the lease start date as the present value of outstanding lease payments discounted at the Company's incremental borrowing rate. Lease payments are made in fixed amounts and presented net of any lease incentives collectible. Leases are subsequently measured at cost after amortization using the interest approach with interest expenses provided over the lease tenor. Lease liabilities will be re-evaluated for any change in lease tenor or lease payment that is not caused by modification of contract terms. In which case, the amount in remeasurement will be adjusted to right-of-use assets.

3. Right-of-use assets are recognized at cost on the lease start date. The cost includes:

   (1) Initial measured amount in lease liability; and
   (2) Any direct cost incurred at initiation.

   Right-of-use assets are subsequently measured using the cost approach with depreciation expenses provided over the useful life or lease tenor, whichever expires the earlier. When lease liability is re-assessed, the right-of-use asset is adjusted for any remeasurement made to lease liability.

4. If there is any contract amendment that reduces the scope of the lease, the lessor will reduce the book value of the right-of-use asset accordingly to reflect partial or total termination of the lease arrangement. Any difference between right-of-use asset and remeasured lease liability is recognized through profit or loss.

(XVI) **Investment property**

Investment properties are recognized at cost at initiation, and subsequently measured using the cost approach. Except for land, investment properties are depreciated on a straight-line
basis over the estimated useful life, which is 30 years.

(XVII)  **Intangible assets**

Intangible asset mainly comprises the cost of computer software, which is amortized using the straight-line method over 3 years.

(XVIII)  **Impairment of non-financial assets**

For assets that show signs of impairment on the balance sheet date, the Company first estimates the recoverable amount in such assets. It recognizes impairment losses if the recoverable amount is lower than the book value. The recoverable amount refers to the higher of an asset's fair value net of disposal cost or its utilization value. Impairment losses previously recognized can be reversed if asset impairment no longer exists or has been reduced. However, the reversal of impairment loss shall not increase the asset's book value above the amount in book value after depreciation/amortization if the impairment loss had not occurred in the first place.

(XIX)  **Loans**

Refers to long-term and short-term funding borrowed from banks. Loans are recognized at fair value less transaction costs at initiation. Any subsequent differences between proceeds net of transaction cost and the redemption value are recognized as interest expenses in profit or loss using the effective interest rate method over the loan duration.

(XX)  **Accounts payable**

1. Refers to liabilities arising from purchases of raw material, merchandise, or service on credit and accounts payable on operating and non-operating activities.
2. Short-term accounts payable that bear no interest are subsequently measured at the original invoice amount as the effect of discounting is insignificant.

(XXI)  **Financial liabilities at fair value through profit or loss**

1. Refers to financial liabilities that arise mainly to buy back in the near future, and financial liabilities held for trading that are not designated as hedging instruments under hedge accounting principles.
2. These items are recognized at fair value at initiation with transaction costs recognized through profit and loss and subsequently assessed at fair value with gains or losses recognized through profit and loss.

(XXII)  **Removal of financial liabilities**

Financial liabilities are removed from the balance sheet upon fulfillmet, cancellation, or expiry of contractual obligation.

(XXIII)  **Non-hedging derivatives**

Non-hedging derivatives are measured at a fair value of the contract signing date at the
initiation. They are presented as financial assets or liabilities at fair value through profit or loss and subsequently measured at fair value. Gains or losses on non-hedging derivatives are recognized in profit and loss.

(XXIV) Liability reserves
Liability reserves (warranty) are obligations that the Company is legally liable or deemed liable to fulfill due to a past event. The Company is very likely to incur an outflow of economic benefit or resource to settle such an obligation. Liability reserves are recognized when the amount in obligation can be estimated reliably. Liability reserves represent the Company's best estimate of the present value of all future obligations that the Company is liable to settle as at the balance sheet date. The discount rate used is a pre-tax discount rate reflecting the market's current perception of the time value of currency and risks associated with the specific liability. The amount in discount is amortized and recognized as an interest expense. No liability reserve is made on future operating losses.

(XXV) Employee benefits
1. Short-term employee benefits
   Short-term employee benefits are measured as non-discounted amounts expected to be paid in the future and are recognized as expenses when relevant service is rendered.
2. Pension - Defined contribution plan
   For a defined contribution plan, the contributions payable to the pension fund are recognized as pension costs in the year that occurred on an accrual basis. Prepaid contributions that are refundable in cash or can be offset against future payments are recognized as assets.
3. Employees' and directors' remuneration
   Employees' and directors' remuneration are recognized as expense and liability when the entity becomes legally obligated or is deemed obligated to pay, and the amount can be reasonably estimated. Any differences between the amount estimated and the amount resolved/paid are treated as a change of accounting estimate.

(XXVI) Share-based payment
In a share-based payment arrangement, the value of employees' services is measured based on the fair value of the equity instrument granted on the grant date. This payment is recognized as remuneration in the period vested, with corresponding adjustments made to equity. The fair value of the equity instrument should reflect the market price and the effects of both vesting and non-vesting conditions. The cost of remuneration to be recognized will be adjusted as service conditions and non-market value vesting conditions are met. The quantity of shares paid on the vesting date will determine the final amount to be recognized in the financial report.
(XXVII) Income tax

1. Income tax expenses include current and deferred income tax. Income taxes are recognized in profit and loss, except for certain items that must be recognized in other comprehensive income or presented directly as equity items.

2. The Company calculates current income tax based on the statutory tax rate applicable at countries of operation and where it generates taxable income as at the balance sheet date. The management regularly assesses income tax filing in accordance with applicable income tax laws and estimates income tax liabilities for the estimated amount in tax payable to the authority. Unappropriated earnings are subject to additional income tax according to the Income Tax Act. This additional tax is recognized in the year after earning is generated, when the earnings appropriation proposal is passed in a shareholder meeting and the amount in earnings retained can be ascertained.

3. Deferred income tax is accounted for using the balance sheet method and recognized on taxable temporary differences that arise between the taxable basis and book value of assets and liabilities shown in the standalone balance sheet. No deferred income tax is recognized upon initial recognition of an asset or liability (except in the case of business combination) if it affects neither accounting profit nor taxable income (tax loss) at the time of the transaction. Temporary differences arising from investment in subsidiaries and associated companies are not recognized as income tax asset/liability if the Company is able to control the timing at which temporary difference is reversed and that the temporary difference is unlikely to be reversed in the foreseeable future. Deferred income taxes are calculated using the tax rate (and tax law) applicable on the day deferred income tax assets/liabilities are expected to be realized/settled, based on prevailing laws as at the balance sheet date.

4. Deferred income tax assets are recognized to the extent that temporary differences are likely to be used to offset future taxable income. Unrecognized and recognized deferred income tax assets are re-assessed on each balance sheet date.

(XXVIII) Dividend distribution

Dividends to the Company's shareholders are recognized in the financial report at the time the resolution is passed in a shareholder meeting. Cash dividends pending payment are recognized as liability, whereas stock dividends pending distribution are presented as pending stock dividends and reclassified into common share capital on the issuance baseline date.
Revenue recognition

1. Sales of goods

(1) The Company manufactures and sells medical computers and peripherals. Sales revenues are recognized when control of the product is transferred to the customer; or in other words, when the product is delivered to the customer and the Company has no outstanding obligation that would otherwise affect the customer from accepting the product. Product transfer is deemed to have completed when the product is shipped to the designated location and the customer accepts the product according to the terms of the sales contract, or if there is objective evidence to prove that acceptance has been made, and thereby transferring all risks associated with obsolescence and loss to the customer.

(2) The Company offers a standard warranty on the products sold and is obligated to repair defective products. Liability reserves are made to account for this obligation at the time of sale.

(3) Accounts receivable are recognized when products are delivered to the customer because this is the point of time when the Company gains unconditional rights to contractual proceeds and is entitled to collect consideration from customers simply through the passage of time.

2. Warranty income

Warranty income in advance that the Company receives for the sale of warranty extension is reclassified into income based on the remaining service duration.

Government subsidies

Government subsidies are recognized at fair value when the Company has reasonable assurance towards fulfilling the government's subsidy criteria and receiving the subsidy. For government subsidies aimed to reimburse expenses incurred, the Company will recognize government subsidies through current profit and loss in a systematic manner when the relevant expenses are incurred.

V. Major sources of uncertainty for significant accounting judgments, estimates and assumptions

The management had exercised judgment to determine the accounting policies to adopt when the standalone financial report was prepared and made accounting estimates and assumptions based on prevailing circumstances and reasonable expectations toward future events as at the balance sheet date. The significant accounting estimates and assumptions made can differ from the actual result, which the management will continually evaluate and adjust based on historical experience and other factors. These estimates and assumptions may result in major adjustments to the book value of assets and liabilities in the next financial year. Uncertainties associated with significant accounting judgments, estimates, and assumptions are explained below:
(I) Significant judgments adopted for accounting policies
None.

(II) Significant accounting estimates and assumptions

Valuation of inventory

Due to the fact that inventory is presented at the lower of cost or net realizable value, the Company is required to exercise judgment and make estimates in order to determine the net realizable value of inventory as at the balance sheet date. Inventory as at the balance sheet may be susceptible to normal wear, obsolescence, or loss of market value due to rapidly changing technologies. The Company estimates the above losses and reduces inventory cost down to the net realizable value. This inventory valuation is made by estimating product demand within a specific period of time in the future, which may give rise to significant changes.

Book value of the Company's inventory as at December 31, 2022 totaled $264,044.

VI. Notes to major accounts

(I) Cash and cash equivalents

</tbody>
</table>

The above aging analysis has been prepared based on the number of days overdue.
2. Balances of accounts receivable (including related parties) as at December 31, 2022 and 2021, had arisen entirely from contractual arrangements with customers. Balances of contractual proceeds receivable from customers (including related parties) and loss provisions as at January 1, 2021 were $114,213 and $4,385, respectively.

3. In the absence of collaterals and other credit enhancements, maximum credit risk exposure associated with the Company's accounts receivable (including related parties) as of December 31, 2022 and 2021, amounted to $239,797, and $208,059, respectively.

4. The Company held no collateral on accounts receivable (including related parties).

5. For credit risk information on accounts receivable (including related parties), please refer to Note 12(2).

</table>

1. The Company has chosen to classify shares of MELTEN CONNECTED HEALTHCARE INC. and ProtectLife International Biomedical Inc., both of which are strategic investments, as financial assets at fair value through other comprehensive income. Fair value of these investments was reported at $27,536 and $32,381 as at December 31, 2022 and 2021.
2. The amounts of fair value changes recognized in the consolidated income statement through other comprehensive income measured at the fair value of financial assets was $(4,845) and $0 in 2022 and 2021, respectively.
3. None of the Company's financial assets at fair value through other comprehensive income was placed as collateral.
4. For information relating to the credit risk of financial assets carried at fair value through other comprehensive income, please refer to Note 12(2).

1. All property, plant, and equipment mentioned above are self-occupied.
2. No borrowing cost was capitalized into the Company's property, plant, and equipment.
3. See Note 8 for details of Property, plant and equipment pledged as collateral by the Group.

(VIII) Leases - as a lessee

1. The Company leases buildings and office equipment; the duration of the lease agreements usually ranges from 1 to 20 years. Lease contracts were individually negotiated and drafted with different terms and conditions with no additional restriction, except that the leased assets can not be placed as collateral.
2. Lease tenors for buildings do not exceed 12 months.
3. Book value of right-of-use assets and recognized amounts of depreciation expense are presented below:

</table>

(IX) Leases - as a lessor

1. The Company leases out its land and buildings. The current lease tenor is from September 2021 to August 2024. However, the lease was prematurely terminated on December 31, 2022. Lease contracts were individually negotiated and drafted with different terms and conditions. To ensure that lease assets are used for the purpose described, lessees are generally prohibited from sub-leasing, lending, or transferring all or part of the leased asset, or in any other way allowing others to make use of the leased asset. Lessees are also prohibited from transferring leases to others.

2. The Company recognized rental income of $6,906 and $2,301 for the years ended December 31, 2022 and 2021, respectively, based on operating lease agreements, of which no variable lease payments were made.

3. Maturity analysis for lease payments collectible on operating leases:

1. The Company signed a contract to purchase real estate property located in Xindian District for a price of $280,077 (tax-inclusive) in March 2021, and the ownership transfer was completed in May 2021. This real estate was originally planned for self-use, but concerns were raised on the inconvenience of relocation, construction and certification of customer plants during the COVID-19 pandemic. After taking into account the above concerns, a decision was made to postpone plant relocation and lease the plant to a related party in September 2021. For this reason, the asset was reclassified into an investment property. The lease of this property was terminated in December 2022 and was therefore reclassified to property, plant and equipment.

2. Rent income and direct expenses associated with investment property:

<table>
<thead>
<tr>
<th>Rent income from investment property</th>
<th>2022</th>
<th>2021</th>

</tr>
</tbody>
</table>
Direct expenses incurred in relation to current rent $1,627 $541
income generated from investment property

3. Fair value of the Company's investment properties was reported at $280,333 as at December 31, 2021 based on the valuation result produced by an independent valuer. The valuation used a combination of the comparative and income approaches, which involved level 3 fair value inputs. Main assumptions of the valuation are as follows:

Income capitalization rate

<table>
<thead>
<tr>
<th></th>
<th>December 31, 2021</th>

(XIV) Long-term loans

Nature of loan | Loan tenor and repayment method | Interest rate range | Collateral | December 31, 2022
---|---|---|---|---
Long-term bank borrowings | Secured borrowings | From May 28, 2021 to May 28, 2036; principal and interest repayable on a monthly basis | 1.73% | Land and buildings | $155,286

Less: current portion of long-term loan | (10,376) | $144,910

Nature of loan | Loan tenor and repayment method | Interest rate range | Collateral | 110年12月31日
---|---|---|---|---
Long-term bank borrowings | Secured borrowings | From May 28, 2021 to May 28, 2036; principal and interest repayable on a monthly basis | 1.00% | Land and buildings | $165,787

Less: current portion of long-term loan | (10,744) | $155,043

(XV) Pension

1. The Company has implemented defined contribution policies in accordance with the "Labor Pension Act" that apply to all employees of local nationality. For employees who are subject to the pension scheme introduced under the "Labor Pension Act," the Company contributes an amount equal to 6% of employee's monthly salary to their individual accounts held with the Bureau of Labor Insurance on a monthly basis. Upon retirement, employees are paid the balance of their pension account plus cumulative gains either in monthly installments or in one lump sum.

2. Total pension costs recognized under the above policies amounted to $5,083 in 2022 and $4,888 in 2021.

(XVI) Liability reserves

<table>
<thead>
<tr>

<tr>
<td>Cash issue retain for subscription by employees</td>
<td>8,174</td>
<td>-</td>
</tr>
</tbody>
</table>

$16,474 $11,046

(XVIII) Share capital

1. Having accumulated the required number of electronic votes, a resolution was passed during the shareholder meeting held in May 2021 to capitalize $27,510 of earnings and issue 2,751 thousand new shares. Registration for the above capital increase was completed in September 2021.

2. The Company had $500,000 of authorized capital (including 6,000 thousand shares reserved for issuance of employee warrant) as per Articles of Incorporation and $332,612 of paid-up capital issued in 33,261 thousand shares at a face value of NT$10 per share as at December 31, 2022. Proceeds from issued shares have been fully collected.
Reconciliation between the opening and closing number of outstanding common shares (in thousand shares) in 2022 and 2021 is explained below:

<table>
<thead>
<tr>
<th></th>
<th>2022</th>
<th>2021</th>

<td>3,000</td>
<td>-</td>
</tr>
<tr>
<td>December 31</td>
<td>33,261</td>
<td>30,261</td>
</tr>
</tbody>
</table>

3. The board of directors passed a resolution on August 7, 2019 to issue employee warrants and later resolved on December 23, 2019 to amend the issuance policy. A total of 1,000 units of the warrant were issued, and each warrant is vested with the right to subscribe 1,000 shares. 1,000 thousand new common shares will have to be issued when the warrants are exercised. The subscription price per share will be determined according to policy. The warrants mentioned above were issued on August 6, 2020; please see Note 6(17) for details.

4. The board of directors passed a resolution to issue 3,000 thousand common shares for cash during the meeting held on December 17, 2021. The cash issue was effected after it was reported to the competent securities authority. The aforementioned capital increase was issued at a price of NT$88 per share and the change of registration was completed on April 14, 2022.

(XIX) Capital reserves

Pursuant to The Company Act, the amount in premiums received on shares issued above the face value plus any capital reserves arising from gifts received may be used to reimburse previous losses. If the Company has not accumulated losses, this amount may be distributed to shareholders in cash or new shares based on shareholders' exiting ownership percentage. Furthermore, according to the Securities and Exchange Act, the amount in capital reserves capitalized into share capital is capped at 10% of paid-up capital per year. The Company may not utilize capital reserves to offset losses when there is still a positive balance in the earning reserves.

(XX) Retained earnings

1. According to the Articles of Incorporation, annual net income concluded by the Company is the first subject to reimbursement of previous losses (including adjustment to unappropriated earnings) followed by a 10% provision for legal reserve. However, no further provision is needed when the legal reserve has accumulated to an amount equal to the Company's paid-up capital. Any surpluses remaining shall be subject to provision or reversal of special reserve as laws or the authority may require. The residual balance can then be added to unappropriated earnings (including adjustment to unappropriated earnings) carried from previous years and distributed as dividends to shareholders, subject to the board of directors' proposal and shareholder meeting resolution. The amount in dividends paid to shareholders must not be less than 5% of total distributable earnings. Cash dividends must not be less than 10% of the sum of cash and stock dividends for the current year. However, cash dividends amounting to less than NT$0.1 per share are to be paid in stock dividends instead.

The Company adopts a residual dividend policy that takes into consideration current and future investment prospects, capital requirements, local and foreign competition, capital budget, shareholders' interest, balanced dividend, long-term financial plans and related factors.

2. The legal reserve may not be used for purposes other than reimbursing previous losses or distributing proportionally back to existing shareholders in the form of cash or new shares. Only the amount in reserve that exceeds paid-up capital by 25% may be distributed in cash or new shares.

3. When distributing earnings, the Company is bound by laws to make provision for special reserves equal to the debit balance of other equity items as at the current balance sheet date before proceeding. If the debit balance of other equity items is reversed on a later date, the amount reversed can be added to available earnings for distribution.

4. The 2021 earnings appropriation proposal was passed through shareholder meeting resolution on May 31, 2022, whereas the 2020 earnings appropriation proposal was resolved by shareholders on May 22, 2021 after accumulating the required number of electronic votes. Details are as follows:
### Legal reserves

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

(1) A resolution was passed during the shareholder meeting held on May 31, 2022 to issue additional common shares at a premium above face value against the capitalization of $33,261 in capital reserves. This is equivalent to NT$1 of stock dividend per share.

(2) A resolution was passed after accumulating the required number of electronic votes during the shareholder meeting held on May 22, 2021 to issue additional common shares at a premium above face value against the capitalization of $27,510 in capital reserves. This is equivalent to NT$1 of stock dividends per share.

As explained above, the appropriation of 2021 and 2020 earnings were indifferent from the proposals raised by the board of directors.

5. Appropriation of 2022 earnings has been proposed and passed by the board of directors during the meeting held on February 21, 2023; details are as follows:

<table>
<thead>
<tr>

1. According to the Articles of Incorporation, any profits remaining after reimbursing cumulative losses in a given year shall be subject to employee remuneration of no less than 5% and director remuneration of no higher than 3%.

2. The Company had estimated employee remuneration at $18,000 and $11,329, and director remuneration at $2,400 and $2,400, for 2022 and 2021, respectively. All above amounts were presented as salary expenses for the respective years.

   Amounts for 2022 were estimated based on the current year's profits and the percentages outlined in the Articles of Incorporation. The board of directors has resolved to pay $18,000 and $2,400, respectively, in cash.

   The board of directors had resolved to pay 2021 employee remuneration and director remuneration at $11,329 and $2,400, respectively; both figures were consistent with the amounts previously recognized in the 2021 financial report and were paid in cash.

   Payment of the above amounts had yet to be completed as at February 21, 2023.

   Details of employees' and directors' remuneration passed by the Company's board of directors can be found on the Market Observation Post System.

3. The Company employed a total of 120 employees in 2022 and 118 employees in 2021; the number of directors without a concurrent role as an employee was 5 in both years.

(XXVI) Income tax

1. Income tax expenses

</tr>
<tr>
<td>Buildings and structures (note)</td>
<td>$ 46,358</td>
<td>$ 47,985</td>
<td>Long-term loans</td>
</tr>
</tbody>
</table>

Note: Property, plant and equipment and investment property as of December 31, 2022 and 2021, respectively, are shown in the table.
IX. Major contingent liabilities and unrecognized contractual commitments

(1) Contingencies

None.

(2) Commitments

None.

X. Losses from major disasters

None.

XI. Major post-balance sheet date events

Appropriation of 2022 earnings has been proposed and passed by the board of directors during the meeting held on February 21, 2023; please see Note 6(20) for details.

XII. Others

I. Capital management

Objectives of the Company's capital management efforts are to ensure continuity of business activities and maintain the optimal capital structure that minimizes funding costs while maximizing returns for shareholders. To maintain or adjust the capital structure, the Company may revise the amount in dividends paid to shareholders, refund capital back to shareholders, issue new shares, or reduce debts by making more effective use of working capital.

II. Financial instruments

1. Types of financial instrument

2. Risk management policy

(1) The Company's day-to-day operations are susceptible to multiple forms of financial risk, including market risks (exchange rate risk, interest rate risk, and price risk), credit risks, and liquidity risks. The Company undertakes forward exchange and cross-currency swap contracts to eliminate exchange rate risks, thereby minimizing the adverse impact of uncertainties on the Company's financial performance.

(2) Risk management is performed by the Company's Treasury Department according to board-approved policies. The Treasury Department is responsible for identifying, assessing, and mitigating financial risks, and it achieves this by working closely with other departments within the Company. The board of directors has implemented written principles on risk management practices and outlined policies for specific matters such as exchange rate risk, interest rate risk, credit risk, use of derivative/non-derivative instruments, and investment of residual liquid capital.

(3) Please see Notes 6(2) and (12) for more details on the use of derivatives for financial risk mitigation.

3. Characteristics and level of significant financial risks

(1) Market risk

   Exchange rate risk

   A. The Company is a multinational organization, and transactions undertaken by the Company in currencies other than the functional currency would give rise to exchange rate risks. USD accounts for the highest exposure of exchange rate risk. Exchange rate risks arise from future commercial transactions and recognized amounts of assets and liabilities.

   B. The management has implemented policies to guide the Company in managing exchange rate risks associated with its functional currency. The Company hedges overall exchange rate risk through its Treasury Department. Exchange rate risks are measured by the value of USD transactions that are highly likely to occur. Instruments such as forward exchange and cross-currency contracts are used to mitigate the effect of exchange rate volatility on expected sales revenues.
C. The Company uses forward exchange and cross-currency swap contracts to mitigate exchange rate risks but does not adopt hedge accounting treatment. Instead, it presents them as financial assets or liabilities at fair value through profit or loss. Please refer to Notes 6(2) and (12) for details.

D. Some of the Company's business activities involve non-functional currencies (the Company's functional currency is NTD), and are therefore susceptible to exchange rate fluctuations. Information on foreign currency-denominated assets and liabilities susceptible to significant exchange rate fluctuation is presented below:

### December 31, 2022

Financial liabilities
**Monetary items**

| USD:NTD   | 1%    | 343   |

**Price risk**

A. Equity instruments held by the Company exposed to price risks have been presented as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To better manage price risks on equity instruments, the Company has implemented concentration limits and diversified its investment portfolio accordingly.

B. The Company mainly invests in equity instruments issued by local companies. Prices of these equity instruments are affected by the uncertainty associated with the future value of the underlying investment. A 1% rise/fall in the price of equity instruments would increase/decrease gain or loss on equity instruments at fair value through profit or loss, and hence net income, by $342 and $465 in 2022 and 2021, respectively, assuming that all other factors remain unchanged. For equity investments that are carried at fair value through other comprehensive income, the above changes would increase/decrease gain or loss on investment by $275 and $324, respectively.

**Cash flow and fair value risk of interest rate**

A. The Company's exposure to interest rate risk arises mainly from short-term and long-term loans borrowed at a floating interest rate, which gives rise to the risk of cash flow change due to the interest rate. This risk is partially offset by cash and cash equivalents held at a floating interest rate. The Company's floating rate borrowings in 2022 and 2021 were denominated in NTD.

B. When interest rates on NTD borrowings had increased or decreased by 1%, with all other factors remaining constant, net income would have decreased or increased by $1,242 and $2,166 in 2022 and 2021, respectively. This is mainly due to the change in interest expense as a result of variable-rate borrowings.

(2) Credit risk

A. Credit risk refers to the possibility of losses suffered by the Company due to its customers or financial instrument counterparties becoming unable to fulfill contractual obligations. These risk events mostly involve the counterparties being unable to settle and pay accounts receivable according to the prescribed terms.

B. The Company has developed credit risk management practices. According to the Company's internal credit policy, all departments are required to perform credit risk management and analysis on every new customer before establishing payment and delivery terms. The Company adopts an internal risk management system that assesses credit quality by considering customers' financial position, previous conduct, and other relevant factors. The board of directors sets individual counterparty risk limits based on internal or external assessments. Uses of credit
limit are monitored on a regular basis.

C. The Company adopts the assumptions stated in IFRS 9 and treats a contract to be in default if payment is overdue for more than 120 days.

D. The Company has adopted the following assumptions mentioned in IFRS 9 to provide the basis for identifying any significant increase in the credit risk of a financial instrument held on hand after initial recognition:
A financial asset is considered to have exhibited a significant increase in credit risk after initial recognition when contractual payment (according to the terms of the underlying contract) becomes past due for more than 30 days.

E. The Company distinguishes accounts receivable (including related parties) by customers' characteristics, and adopts a simplified approach along with the use of provision matrix and loss given default to estimate expected credit loss.

F. Financial assets that are rationally deemed unrecoverable after exhausting collection efforts are charged off. In which case, however, the Company will continue taking legal actions to secure debt entitlement. The Company had no charged-off debt with ongoing collection activities as at December 31, 2022 and 2021.

G. (1) Customers of good credit background and insured accounts receivable are subject to loss given a default of 0.2%. As at December 31, 2022 and 2021, the Company had outstanding accounts receivable of $119,626 and $88,801 and had made bad debt provisions of $239 and $199, respectively.

(2) The Company takes into account multiple considerations, including the Monitoring Indicator published by National Development Council, future prospects, historical and current information etc. to determine loss given default, which is used for estimating loss provisions on accounts receivable from customers under normal credit conditions. Provision matrix as at December 31, 2022 and 2021, is as follows:

<table>
<thead>
<tr>
<th></th>
<th>Current</th>
<th>Overdue within 30 days</th>
<th>Overdue 31 - 60 days</th>
<th>Overdue 61 - 90 days</th>
<th>Overdue 91 - 120 days</th>
<th>Overdue more than 121 days</th>
<th>Total</th>
</tr>

</tbody>
</table>

H. Below are changes in loss provision on accounts receivable (including related parties), determined using the simplified approach:
January 1 2022 4,334 2021 4,385
Reversal of impairment loss (1,193) (51)
Amount unrecoverable and charged off (332)
December 31 $2,809 $4,334

Of loss reversals in 2022 and 2021, the reversal of impairment losses on receivables arising from customer contracts was $1,193 and $51, respectively.

(3) Liquidity risk

A. Cash flow projections are made by individual departments within the Company and consolidated by the Treasury Department. The Treasury Department is responsible for monitoring and predicting liquidity and capital requirements within the Company and ensuring that adequate capital has been sourced to support operational requirements.

B. As at December 31, 2022 and 2021, the Company had undrawn credit limits of $194,000 and $59,000, respectively.

C. Non-derivative financial liabilities are presented in the chart below. The Company analyzes them based on their remaining timespan from the balance sheet date until contract maturity. The amount of contractual cash flow shown in the table below are not discounted.

<table>

D. The Company does not expect cash flows in the maturity analysis to occur at an earlier time, or in amounts that differ significantly.

III. Fair value information

1. Valuation techniques and inputs used for measuring fair value of financial and non-financial instruments are defined below:
   Level 1 input: Quotations that can be obtained from an active market (unadjusted) on the measurement date for asset or liability of equivalent nature. An active market is one where assets or liabilities are transacted in sufficient frequency and quantity and where price information is provided on an ongoing basis. Fair value of investments in listed shares is determined using this input.
   Level 2 input: Inputs can be observed directly or indirectly on an asset or liability, except for quotations covered in level 1 input. Fair value of investments in derivative instruments is determined using this input.
   Level 3 input: Inputs that can not be observed for an asset or liability. Investments in equity instruments without an active market are valued using this input.

2. For fair value information of investment properties carried at cost, please refer to Note 6(10).

3. Financial instruments not measured at fair value
   Accounts including cash and cash equivalents, accounts receivable (including related parties), other receivables (including related parties), other financial assets (presented as other current assets), guarantee deposits paid (presented as other non-current assets), short-term loans, accounts payable (including related parties), other payables (including related parties), lease liabilities, long-term loans (including current portion due in one year), and guarantee deposits received have book value that closely resembles their fair value.

4. Financial and non-financial instruments carried at fair value are classified by the Company on the basis of the nature, characteristics and risks of the assets and the fair value hierarchy, and the related information is as follows:
   (1) The Company's assets and liabilities by nature:

<table>
<thead>
<tr>
<th>December 31, 2022</th>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Total</th>
</tr>
</thead>

### Assets

#### Recurring fair value

**Financial assets at fair value through profit or loss**

<table>
<thead>
<tr>
<th>Equity securities</th>
<th>$7,211</th>
<th>$-</th>
<th>$26,956</th>
<th>$34,167</th>
</tr>
</thead>
</table>

**Financial assets at fair value through other comprehensive income**

<table>
<thead>
<tr>
<th>Equity securities</th>
<th>$-</th>
<th>$-</th>
<th>$27,536</th>
<th>$27,536</th>
</tr>
</thead>
</table>

**Assets at December 31, 2021**

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>$7,211</td>
<td>$-</td>
<td>$27,536</td>
<td>$34,167</td>
</tr>
<tr>
<td>$10,125</td>
<td>$-</td>
<td>$32,381</td>
<td>$46,531</td>
</tr>
</tbody>
</table>

(2) Methods and assumptions used for measuring fair value:

A. Instruments using market quotation as fair value input (i.e. level 1), distinguished by characteristics:

<table>
<thead>
<tr>
<th>Market quotation</th>
<th>TWSE/TPEX listed shares</th>
</tr>
</thead>
<tbody>
<tr>
<td>Closing price</td>
<td></td>
</tr>
</tbody>
</table>

B. Except for financial instruments traded in active markets, as described above, fair values of all other financial instruments were obtained either by applying valuation techniques or by referring to counterparties' quotations.

C. For the valuation of non-standardized financial instruments of low complexity, the Company adopts valuation techniques commonly used among market participants. Valuation models for this type of financial instrument often use observable market information as the parameter.

D. Derivatives are valued using valuation models that are commonly accepted among market users, such as the discounted cash flow approach. Forward exchange contracts are usually valued using the prevailing forward exchange rate.

E. Results generated from the valuation model are approximations of the estimate. The valuation technique may not reflect all relevant factors associated with the holding of financial and non-financial instruments. For this reason, estimates generated from the valuation model are adjusted using additional parameters, such
as modeling risks or liquidity risks. Judging by the Company's fair value assessment modeling policies and control procedures, the management is confident that they ensure a fair presentation for the fair values of financial and non-financial instruments shown on the balance sheet. All valuation adjustments made were appropriate and necessary. All price information and parameters used in the valuation process have been thoroughly assessed and adjusted appropriately according to the prevailing market conditions.

5. There had been no transfer between level 1 and level 2 input in 2022 or 2021.

6. Changes in level 3 input in 2022 and 2021 are explained below:

<table>
<thead>
<tr>
<th></th>
<th>2022</th>
<th>2021</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 1</td>
<td>$ 68,787</td>

<td>-</td>
</tr>
<tr>
<td>December 31</td>
<td>$ 54,492</td>
<td>$ 68,787</td>
</tr>
</tbody>
</table>

Note 1: Presented as other gains and losses.
Note 2: Presented as unrealized gain/loss on valuation of equity instruments at fair value through other comprehensive income

7. There had been no transfer to or from level 3 input in 2022 or 2021.

8. The Treasury Department is responsible for validating the fair value of assets that require the use of level 3 fair value input. The department relies on independent sources of information to ensure that the valuation results closely resemble the market condition; it verifies that information is obtained from independent, reliable, and consistent sources; and makes necessary fair value adjustments to ensure that valuation results are reasonable.

Furthermore, the Treasury Department has financial instrument fair value evaluation policies and procedures in place and adopts practices to ensure compliance with International Financial Reporting Standards.

9. Quantitative information and sensitivity of significant and unobservable inputs used for level 3 fair value measurement are explained below:

<table>
<thead>
<tr>
<th>Equity instrument:</th>
<th>Fair value as of December 31, 2022</th>
<th>Valuation technique</th>
<th>Significant and unobservable input</th>
<th>Range (weighted average)</th>
<th>Relationship between input and fair value</th>

</table>

Note 1: Long-term revenue growth rate, the weighted average cost of capital, long-term pre-tax operating profit, discount for lack of marketability, discount for minority interest.

Note 2: The higher the weighted average cost of capital, discount for lack of marketability, and discount for minority interest, the lower the fair value; the higher the long-term revenue growth rate and long-term pre-tax operating profit, the higher the fair value.

10. The Company exercises a high level of discretion and evaluation in selecting valuation models and parameters. However, the uses of different valuation models or parameters may produce different valuation results. For financial assets classified as level 3 input, impacts on other comprehensive income in the event of a change in valuation parameter are explained below:

IV. **Assessment of COVID-19 impact**

Per assessment, the spread of COVID-19 and disease control policies imposed by the government had not caused a material impact on the Company's operations as of December 31, 2022. Furthermore, the Group has adopted appropriate measures to prevent the effect of COVID-19 on its operations and is closely monitoring future developments.

XIII. Other disclosures

I. Information related to significant transactions

Significant transactions undertaken by the Company in 2022, as defined in Regulations Governing the Preparation of Financial Reports by Securities Issuers, are explained below; disclosures concerning investees have been prepared based upon investees' audited financial statements for the corresponding period; transactions with subsidiaries have been eliminated while preparing the consolidated financial report, and are disclosed below solely for reference.

1. Loans to external parties: None.
2. Endorsement/guarantee to external parties: None.
3. End-of-period holding position of marketable securities (excluding investment in subsidiaries, associated companies, and joint ventures): Please refer to Attachment 1.
4. Cumulative purchase or sale of the same marketable securities amounting to NT$300 million or more than 20% of the paid-up capital: None.
5. Acquisition of real estate amounting to NT$300 million or more than 20% of paid-up capital: None.
6. Disposal of real estate amounting to NT$300 million or more than 20% of paid-up capital: None.
7. Sales and purchases with related parties amounting to NT$100 million or more than 20% of paid-up capital: Please refer to Attachment 2.
8. Related party accounts receivable amounting to NT$100 million or more than 20% of paid-up capital: Please refer to Attachment 3.
9. Trading of derivatives: Please see Notes 6(2) and (12).
10. Major business dealings between the parent company and subsidiaries and transactions between subsidiaries: Please see Attachment 4.

II. Information on business investments

Names, locations, and information on investees (excluding Mainland investees): Please see Attachment 5.

III. Information relating to investments in the Mainland

1. Profile: Please see Attachment 6.
2. Significant transactions with Mainland investees, whether directly invested or indirectly invested through a third location: None.
IV. **Information on major shareholders**
Information on major shareholders: Please see Attachment 7.

XIV. **Segment information**
Not applicable.

1. Total employee count was 120 in 2022 and 118 in 2021; the number of directors without a concurrent role as an employee was 5 in both years.

2. The Company is required to make the mandatory disclosures below given that its shares are listed for trading on Taipei Exchange (TPEX):
   (1) Average employee benefit expense was reported at $1,438 for 2022 and $1,245 for 2021.
   (2) Average employee salary expense was reported at $1,293 for 2022 and $1,107 for 2021.
   (3) Change in average employee salary expenses was calculated 16.80%.
   (4) The Company has assembled an Audit Committee. Therefore, no compensation was recognized for supervisors in 2022 and 2021.
3. The Company's salary and compensation policy is as follows:

   (1) In accordance with the Company's Articles of Incorporation, the remuneration of the Company's directors shall be determined by a meeting of the board of directors authorized by the shareholders based on the extent of their participation in the Company's operations and the value of their contributions, with reference to domestic and international industry standards. The Articles of Incorporation also caps director remuneration at 3% of annual profit. Principles for payment of director remuneration:

   A. The Company may compensate independent directors with monthly fixed payments regardless of profitability, based on individual participation and contribution to the Company's operations.

   B. Independent directors of the Company are not entitled to director remuneration or any other form of profit-sharing besides monthly fixed compensations. For non-independent directors, the Remuneration Committee will recommend the method and amount of remuneration after considering the board's overall performance and the Company's business performance and raising the proposal for board of directors' resolution.

   (2) Compensations for the Company's managers are determined after taking into consideration their individual duties, individual contribution, the performance of the Company for the year, and future risks. Compensation proposals are reviewed by the Remuneration Committee and forwarded to the board of directors for final resolution. Managers' compensation comprises the same components as general staff, which include: monthly salary, quarterly incentive bonus, and employee remuneration.

   (3) The Company determines employees' salary after considering the organization's performance, industry risks and trends, as well as performance, target accomplishment, and contribution of each individual. Employees' compensation includes: monthly salary, quarterly incentive bonus determined based on organizational performance, and remuneration determined based on the Company's profit performance for the year.

**Note 1:** Where the terms of related party transactions differ from ordinary transactions, the discrepancy and causes of discrepancy shall be explained in the unit price and loan tenor columns.

**Note 2:** In the case of advanced receipt (prepayment), explain in the remarks column the reason, terms & conditions, amount and deviation from general transaction terms.

**Note 3:** Paid-up capital refers to that of the Parent company. If the issuer has issued shares without a face value or at face values other than NT$10 per share, the 20% requirement on paid-up capital shall be calculated instead at 10% of equity attributable to parent company shareholders, as shown on the balance sheet.

**Note 4:** Disclose the revenue side; no disclosure is needed on the opposing side of the same transaction.

Note 1: Please input as related party accounts/notes/other receivables.
Note 2: Paid-up capital refers to that of the Parent company. If the issuer has issued shares without a face value or at face values other than NT$10 per share, the 20% requirement on paid-up capital shall be calculated instead at 10% of equity attributable to parent company shareholders, as shown on the balance sheet.
ONXY Healthcare Inc.

Major business dealings between the parent company and subsidiaries and transactions between subsidiaries

January 1 to December 31, 2022

Unit: NT$ thousand
(unless specified otherwise)

<table>
<thead>
<tr>

</tbody>
</table>

Note 1: Business dealings between the parent company and subsidiaries are indicated in the serial number column. The numbering rule is explained below:

(1) 0 for the parent company.
(2) Each subsidiary is numbered in sequential order starting from 1.

Note 2: Related party transactions are distinguished into one of three categories, as shown below. Only the category is indicated (no duplicate disclosure is made on two counterparties of the same transaction; for example, in a parent-to-subsidiary transaction, no disclosure is made on the subsidiary's end if disclosure has already been made on the parent company's end; in a subsidiary-to-parent transaction, no disclosure is made on one subsidiary's end if disclosure has already been made on the other subsidiary):

(1) Parent to subsidiary.
(2) Subsidiary to parent.
(3) Subsidiary to subsidiary.

Note 3: Calculation for business dealings as a percentage of total consolidated revenues or total assets is explained as follows: for balance sheet items, percentage of period-end balance is calculated relative to consolidated total assets or liabilities; for profit and loss items, percentage of end-of-period cumulative amount is calculated relative to consolidated total revenues.

Note 4: The Company determines key transactions presented in this chart based on principles of materiality.

Note 5: Individual transactions that amount to less than $50,000 are not disclosed; disclose the asset or revenue side only. No further disclosure is needed on the opposing side of the same transaction.

Note 1: If the public company has set up a foreign holding entity and prepared a consolidated financial report on the holding entity according to local regulations, information on foreign investees can be disclosed to the level of the foreign holding entity, and no further breakdown is needed.

Note 2: Companies that do not meet the condition described in Note 1 shall complete the form according to the following rules:
1. For columns including "Name of investor," "Location," "Main business activities," "Sum of initial investment," and "Period-end holding position," list down investees that are held by the Company first, followed by those held by directly controlled investees and indirectly controlled investees. Specify in the remarks column the relationship between each investee and the Company (such as a subsidiary or 2nd-tier subsidiary).
2. For "Current period profit/loss of the investee," specify the amount of profit or loss made by each investee in the current period.
3. For "Investment gains/losses recognized in the current period," specify only the amount of profit or loss that the Company has recognized from directly held subsidiaries and equity-accounted investees. No disclosure is needed on indirectly held investees. When disclosing "current gains/losses recognized on directly held subsidiaries," make sure that the gains/losses already include investment gains/losses that they are required to recognize on their investments.

Note 3: Amounts that are denominated in foreign currencies shall be converted into NTD using either the average exchange rate between January 1 and December 31, 2022 for profit or loss items or the exchange rate at the end of the reporting period for all other items.

### Note 1: Method of investment is distinguished between the three categories below, and presented in category name only:

1. Direct investment into the Mainland
2. Indirect investment into the Mainland through a third location (please indicate the name of the investee at the third location)
3. Other methods

### Note 2: With regards to investment gains/losses recognized in the current period:

1. Additional remarks are made for investments that are in the midst of preparation and have yet to produce gains or losses
2. Investment gains or losses are specified for having been recognized using one of the following three bases:
   A. Based on financial statements audited by the R.O.C. partner of an international CPA firm.
   B. Based on audited financial statements of the parent company in Taiwan.
   C. Others.

### Note 3: Figures in this chart are presented in NTD.

### Note 4: Amounts that are denominated in foreign currencies shall be converted into NTD using either the average exchange rate between January 1 and December 31, 2022 for profit or loss items or the exchange rate at the end of the reporting period for all other items.

</tbody>
</table>

Note 1: Information on major shareholders, as presented in this chart, was taken from the records of Taiwan Depository & Clearing Corporation as at the final business day of each quarter, and included parties holding book-entry common and preferred shares (including treasury stock) for an aggregate ownership of 5% and above.

Share capital reported in the Company's financial statements may differ from the number of shares delivered via book entry due to different basis of preparation/calculation.

Note 2: Shareholders who placed shares under the trust are disclosed in trustors' sub-accounts held with various trustees. According to Securities and Exchange Act, shareholders with more than 10% ownership interest are subject to insider equity reporting. Insider equity includes shares held in own name and any shares placed under a trust that the insider has control over. Please access Market Observation Post System for reports on insider equity.
